

**FY 2025 STP-L MATCHING
FUND AWARD**

Narrative

Last month, the board approved acceptance of the STP-L funds that were awarded through the El Paso MPO. Staff had submitted an application to the New Mexico Matching Fund through DFA and was given a conditional approval. As a reminder, the STP-L grant was awarded in the total amount of \$493,393. Of that amount, \$421,554.98 is the federal portion, and \$71,838.02 is the local match that will now be covered by the New Mexico Match Fund through DFA.

Project Description

The awarded funds are intended to design and construct a solar array on a portion of the land at the new Sunland Park facility. This project will supply power to our forthcoming electric bus and van fleet, while potentially contributing to the power needs of the rest of the facility and even allowing SCRTD to sell power back to the grid.
