

Solar Array Project Update

Work in progress – please use caution on site

Updated Traffic & Parking Areas

Please continue following the designated routes and parking areas as shown.

! Safety Reminder

- Drive slowly in the back area
- Watch for active work zones & equipment
- Be cautious around contractors on site

Operations Update

There is no impact to standard vehicle routes at this time.
No alternate routing is needed.

Parking Reminder

Do not park in the shaded area near the diesel tank.
This area may be used for material storage.

Project Update

Team,

I wanted to provide a brief update on the solar array installation and share a few important reminders as work continues on site.

Racking is currently being installed, and OE Solar will continue progressing with additional work, including ground screw installation and trenching over the coming weeks.

As you may have seen, trenching work is now underway in the back area of the facility. The path has been marked by contractors (see attached images). Please use caution when driving through this area, drive slowly, and be mindful of active work zones, equipment, and contractors on site.

At this time, there is no impact to our standard vehicle routes. Access restrictions will only apply to specific areas where battery connections are being installed, so no alternate routing is needed.

Please also note that the area near the diesel tank may be used for material storage. Employees should avoid parking in this area until further notice.

Thank you all for your continued cooperation and attention to safety as we move forward with this project.

If you have any questions, please feel free to reach out.

Best,
Daniela Gutierrez
